

Lifespark Technologies

Thoughtfully Yours :)

A healthcare technology company building a platform for continuous, optimal therapy in chronic neurological disorders

Global Ageing

10% of the world population is aged over 60

- Will double by 2050
- Indian elderly population to rise by 41% over the next decade
- Typically seen as a liability
- Can be an asset if we maintain healthspan

Health issues

More than 1 in 4 elders have a fall

- One of the largest causes of disability
- Neurological and orthopedic conditions, accidents
- Major economic stress in low and middle income families
- Even without injuries, costly due to reduced caregiver productivity

Decentralized Healthcare

- Need for a change in attitude towards healthcare in the general population
- Not an acute issue
- AI and devices can help re-enable as well as prevent
- In Parkinson's, savings upto Rs.400000 per year per family (\$5000)
- Globally more than \$100 Billion

Example

Thank you
