Final diagnosis \*

Assessment of Problems in Healthcare Delivery

Was there a problem related to the particular category ? \*

☒ Yes ☐ No

Did the problem lead to Harm ?

☐ Yes ☐ No ☐ Probably

Problem in assessment, investigation or diagnosis ?

Problem with Medication ?

Problem related to treatment or Management plan? ( including delays in initiation of treatment, coordination between care providers, delay in cross referral

Problem with Infection Control?

Problem related to surgery/Invasive procedure ?

Problem in MET response/ CPR ?

Problem in Equipment/Technology ?

Problem not fitting into the above categories ?

### Category 1: Anticipated death

1a) due to terminal illness (anticipated by clinicians and family); and/or

1b) following cardiac or respiratory arrest before arriving at the hospital.

Category 2: Not unexpected death, which occurred despite the health service taking preventive measures.

Category 3: Unexpected death which was not reasonably preventable with medical intervention.

Category 4: Preventable death where steps may not have been taken to prevent it.

Category 5: Unexpected death resulting from a medical intervention.

### Triggers :

- All cases which are escalated for a Level 2 Review following a Level 1 review.
- All Post-procedural deaths
- All maternal deaths
- All MLC Deaths
- All deaths following a serious incident
- All deaths in which an issue of concern is raised by a clinician, other clinical staff, or by the patient's family.
