

**CERVICHECK**  
BY PRAGMATECH HEALTHCARE SOLUTIONS

# Cervical Cancer in India

67,477 Deaths

2<sup>nd</sup> leading cause of cancer among Indian women

1 Lakh new cases detected every year

# Cervical Cancer in US

< 3000 Deaths

0.4% of all women cancer

< 10,000 new cases every year

**The stark contrast due to lack of periodic screening**

# Barriers to Periodic Cervical Screening in India\*

**Distressing Sampling  
Procedure – Pelvic  
Examination**

**WHO: To Eliminate cervical cancer by 2030,  
70% of a country's eligible women population must be  
screened.**

**India: Only 1% population screened**

**Limited accessibility of  
collection and testing at  
camps**

*\*Several peer reviewed  
publications over the decade*

# Democratizing Cervical Cancer Screening industry in India and LMI Countries

- Winner, Pfizer INDovation Program, 2022
- Recipient HDFC Smart-Up CSR Grant, 2022
- Recipient BIRAC BIG - 19 Grant, 2022
- AIM (Atal Innovation Mission) PRIME Cohort Member 2021, Winner of Popularity Award, 2022
- Winner, TIE Women Global Pitch Competition - Vadodara Chapter, 2021
- Winner, Stanford Seed Spark, Cohort of May'21, 2021
- Recipient, AAGS'21 (Australian Alumni Grant) Award by Australian Consulate, 2021
- Winner, SWISSNEX AIT 2020 organized by Swiss Consulate, 2020

CONFIDENTIAL

# The CERVICHECK™ Kit : Sampling + Screening

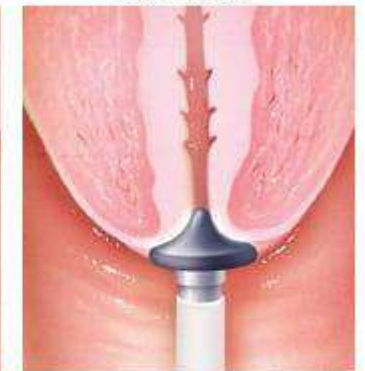

A point-of-care dipstick  
assay that detects cervical  
lesions at a treatable point ( $\geq$   
CIN1), with samples  
collected using a patented  
self-sampling device.

LEEP

Cryosurgery

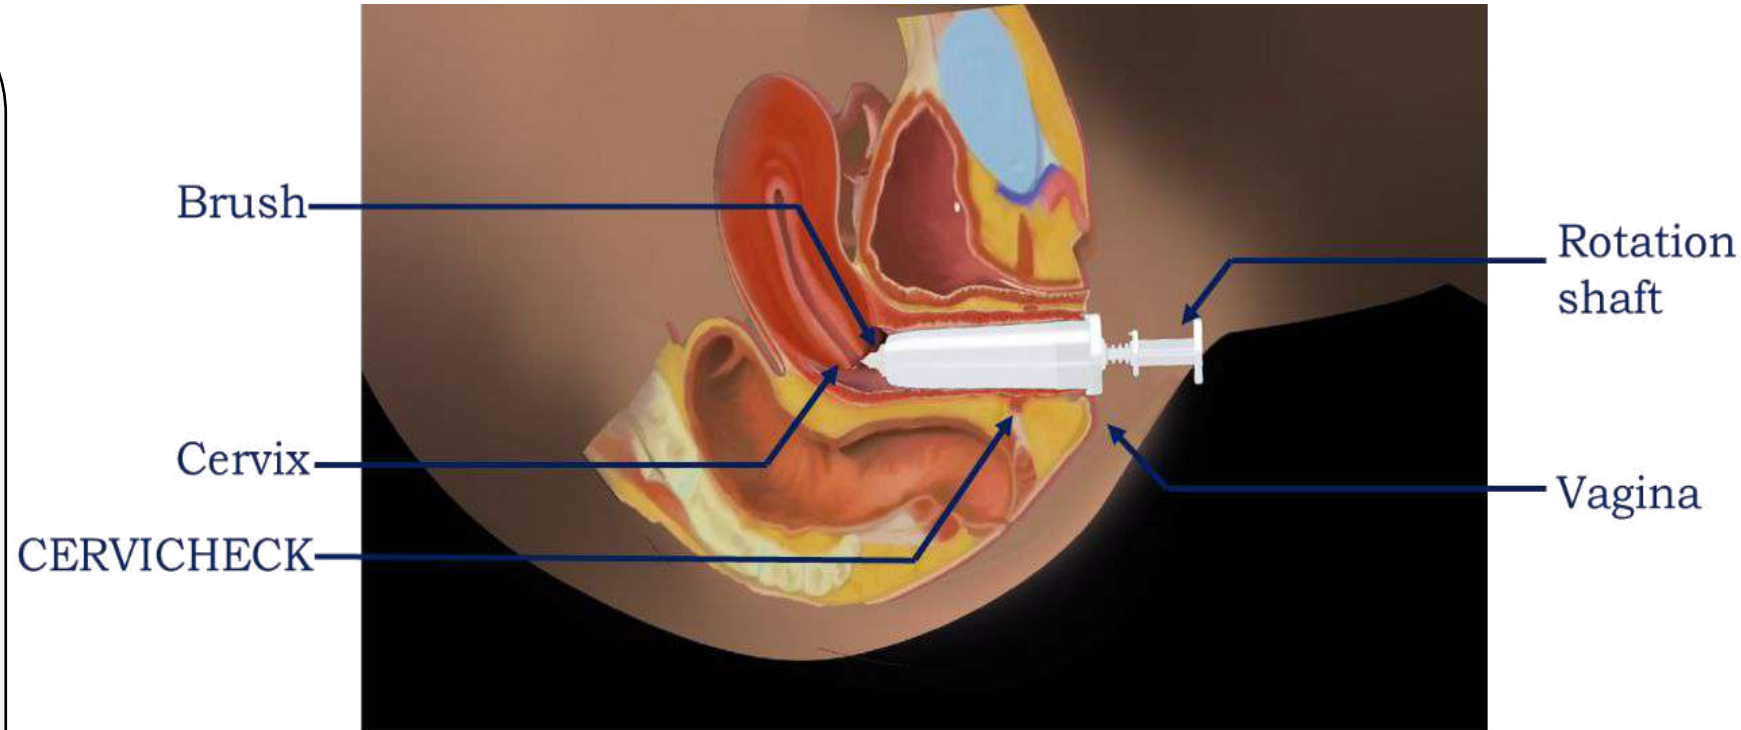

# The CERVICHECK™ Collection Device : USP

Unlike other self-sampling kits available globally, our innovative design enables collection of cells from the “transformation zone/Surface of the Cervix” which in-turn allows the triaging.

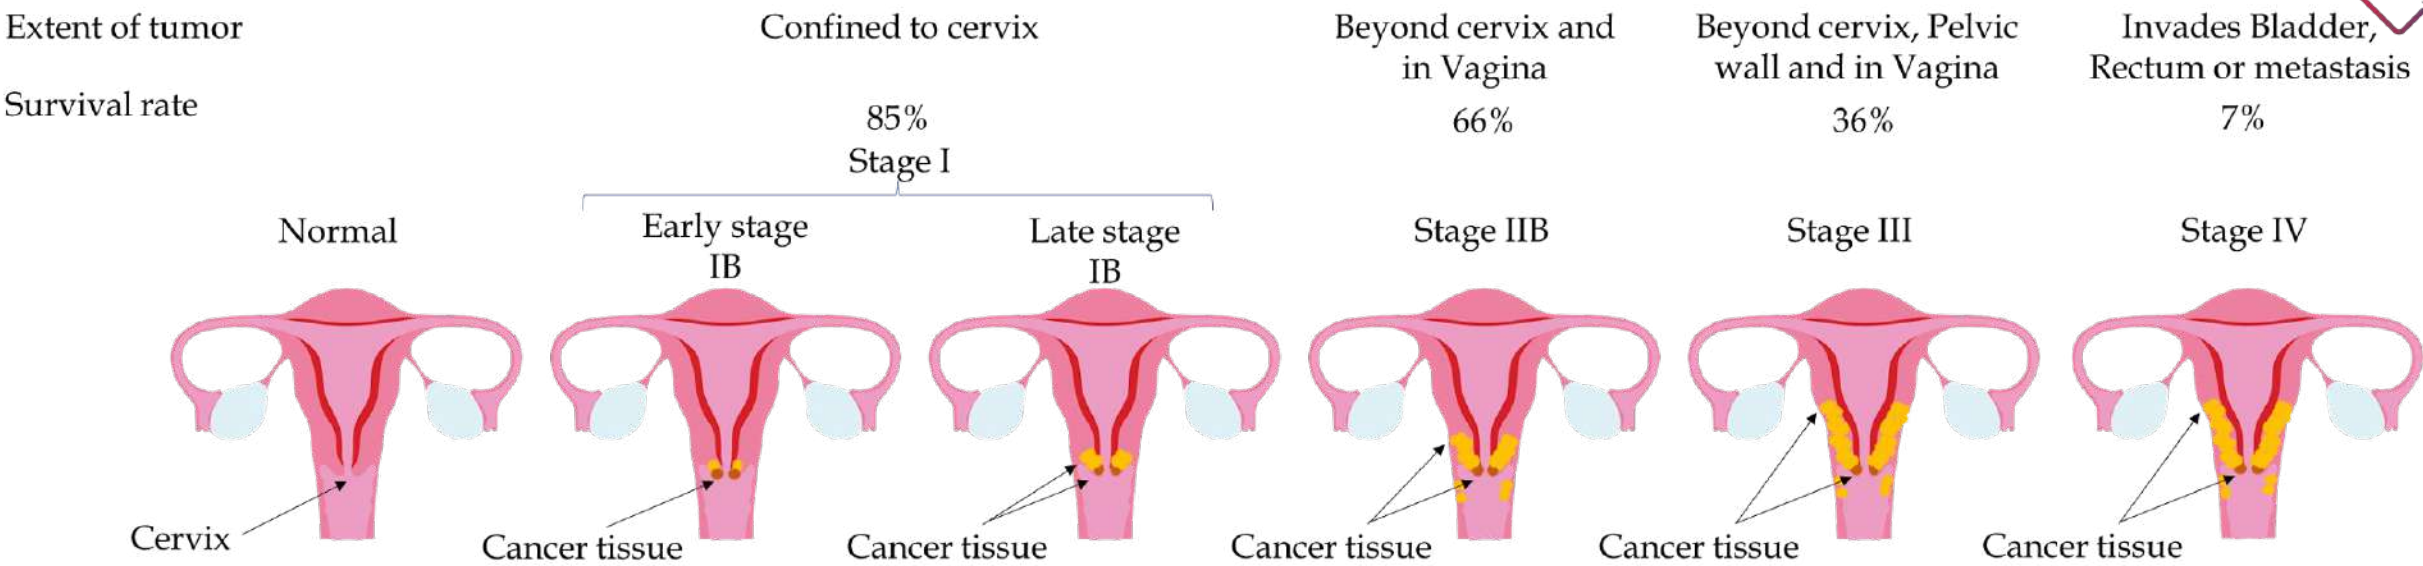

- Enabling a Dual Test
- Dual Test / Triage

Recommended in India to  
reduce drop-outs

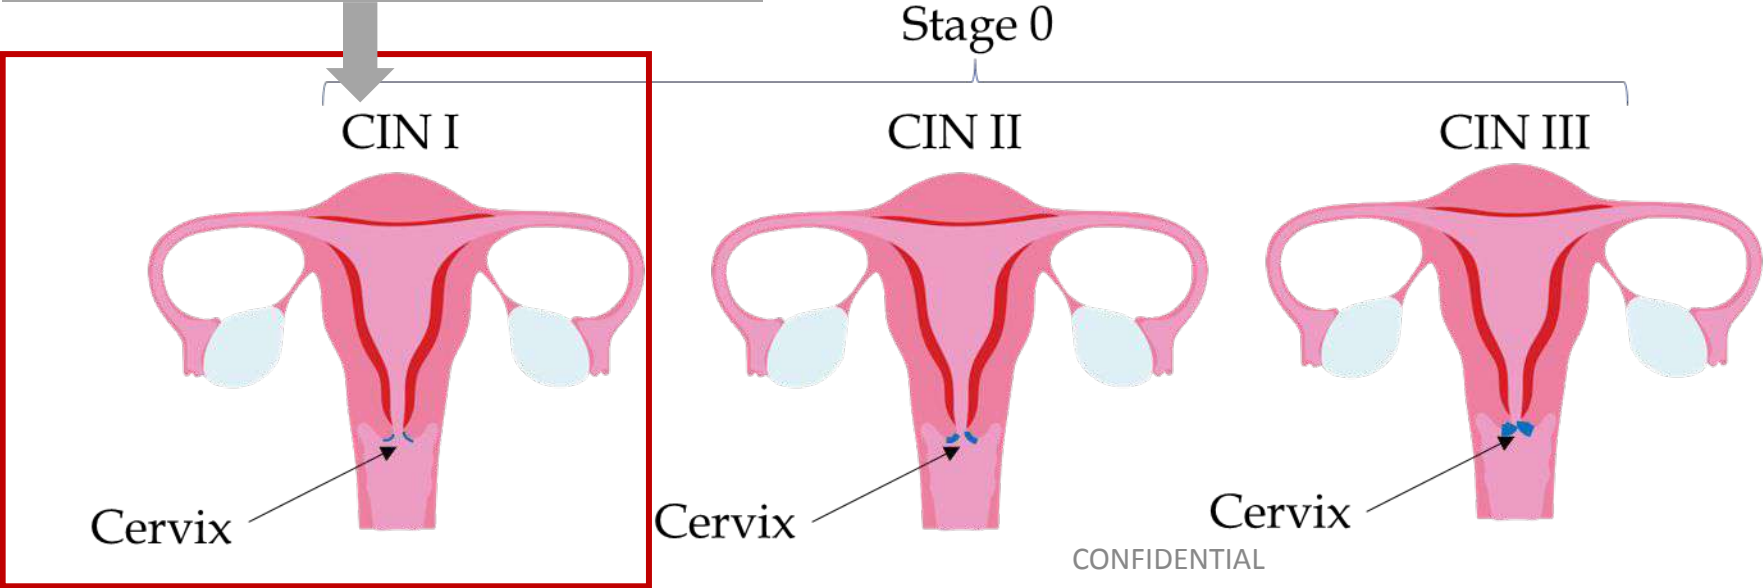

Utility Patent

# Stages of Cervical Cancer

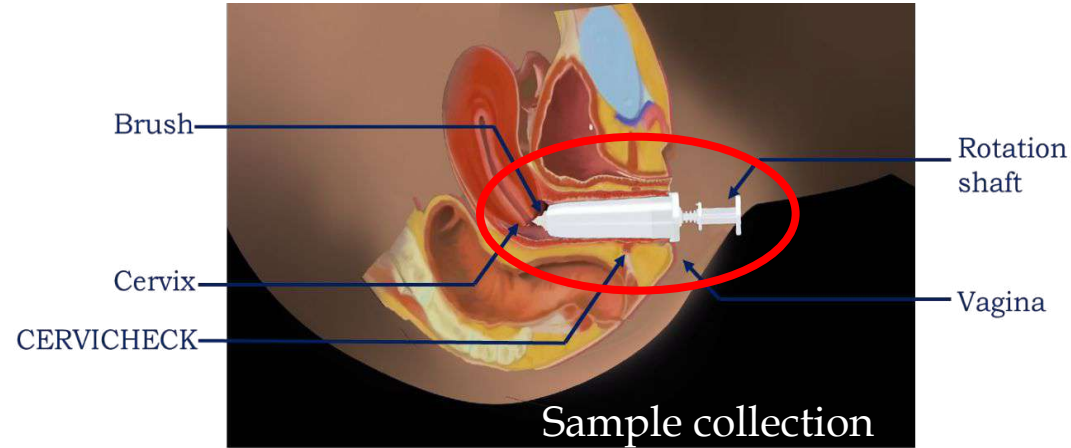

Targeted Detection Stage for CERVICHECK Screening Assay

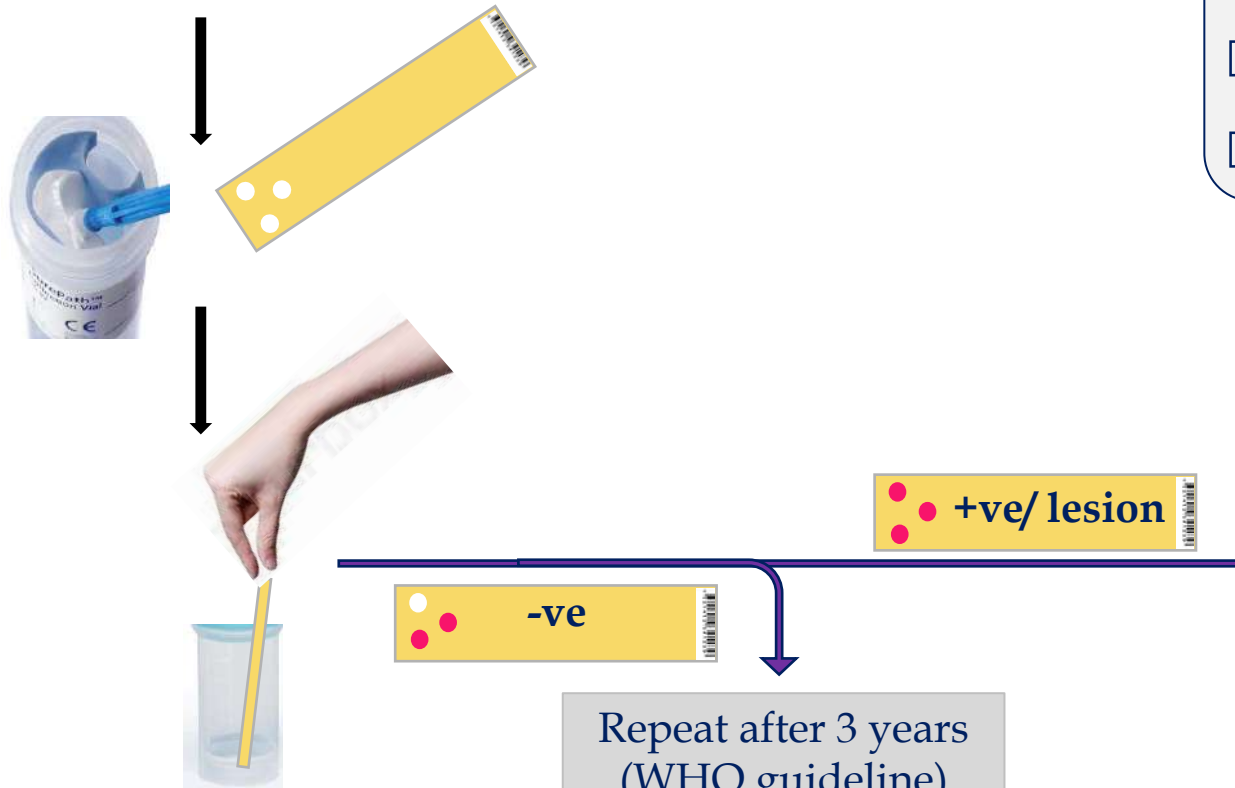

Extent of tumor: 0,  
Only on the surface of Cervix  
Survival rate: 100%

# The CERVICHECK™ Workflow: Sampling + Screening

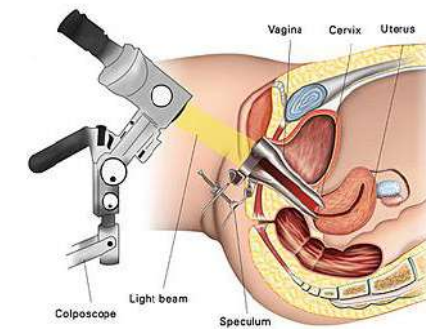

- Ability to access the Cervix – Basis of Utility Patent
- Reliable results and accurate sampling

Point of care testing

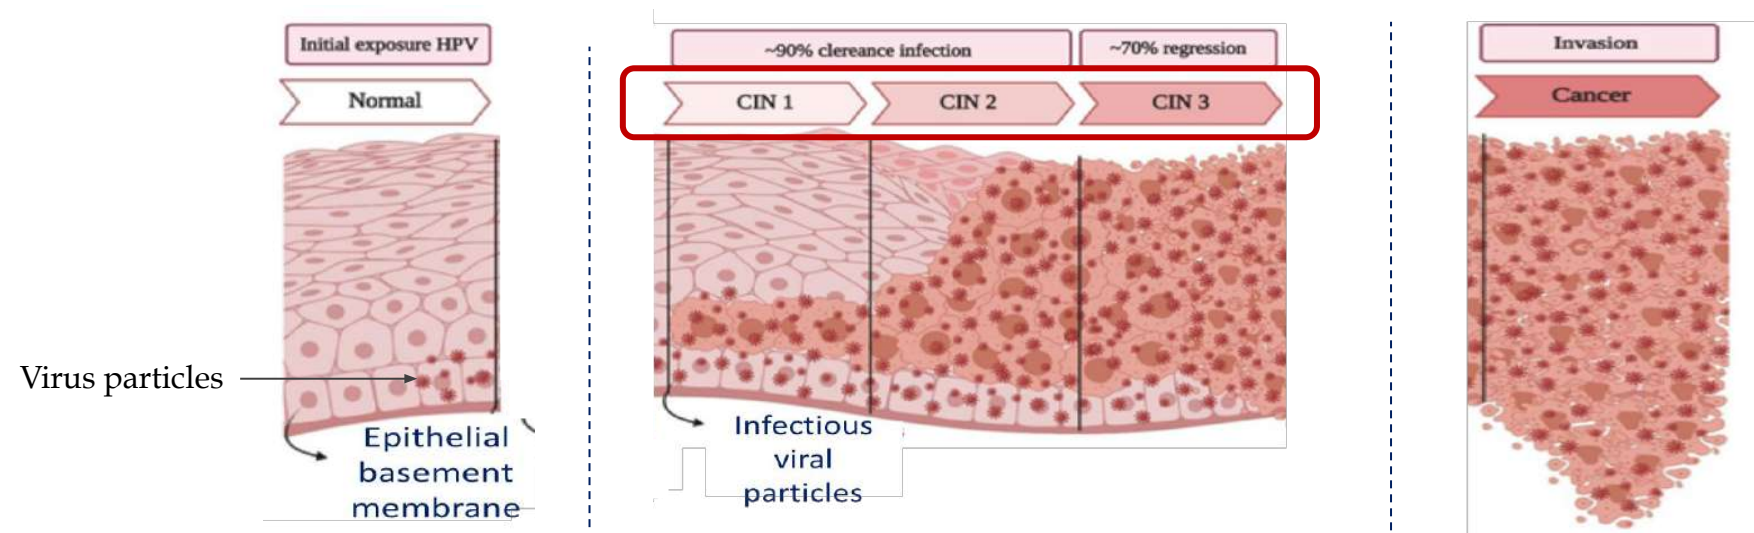

- Point-of-Care Testing
- No User-Variability/Subjectivity
- Screen and treat

Colposcopy and  
Treatment at Nearest  
Resource

# Competition

Intended Detection Stage	Early Lesions
Methods	CERVICHECK Assay
Sample collection	Self (Using CERVICHECK Device) + Speculum
Follow up Action	Colposcopy
Treatment	Treatment through CRYO or Leep
Infrastructure Requirement	Low
Skilled Manpower Requirement	Low
Result Integrity	High
Cost	Low

# The Market Place : Cervical Cancer Preventive Screening

TAM : 207M  
Healthy Women  
(Age: 30-60) in  
India<sup>1</sup>

SAM: 22% of TAM  
“Opportunistic”  
coverage<sup>2</sup> of screening –  
45M Women

SOM: 7% of SAM  
3M Women

**Indian Market**

Global for PAP  
and HPV: USD  
2.5B (INR 19K  
Crore), growing  
33.5% annually<sup>3</sup>

**Anirban Palit**  
**(MD and Commercial Lead)**

10 years experience in IVD Industry with Roche Diagnostics India.  
Expertise: Marketing and Sales, M.S, MBA

**Sayantani Pramanik,**  
**PhD (Product Lead)**

5 years experience in Bio-Pharma MNCs.  
Expertise: Research and Development  
M.Sc., Ph.D.

**Dr. Bhagirath Modi**  
**(Medical Affairs Lead)**

Practicing Gynecologist in Vadodara, Gujarat for over 40 years. Expertise: Clinical and Technical Advising. MBBS, MD

**Palna Patel**  
**(Outreach Lead)**

7 years of practice as a lawyer. Closely works with NGOs.  
Expertise: Communications.  
MSW, LLB

# Our Measurable Impact

$\Delta$  in the number of women who are treated at a Gynaecs clinic by LEEP/CRYO, as against treated for cancer, and eventually YoY reduction deaths.
