

An innovative, impactful, and scalable solution for enhancing patient safety and legal awareness

Immersive training tool to address patient safety and legal implications in nursing practice

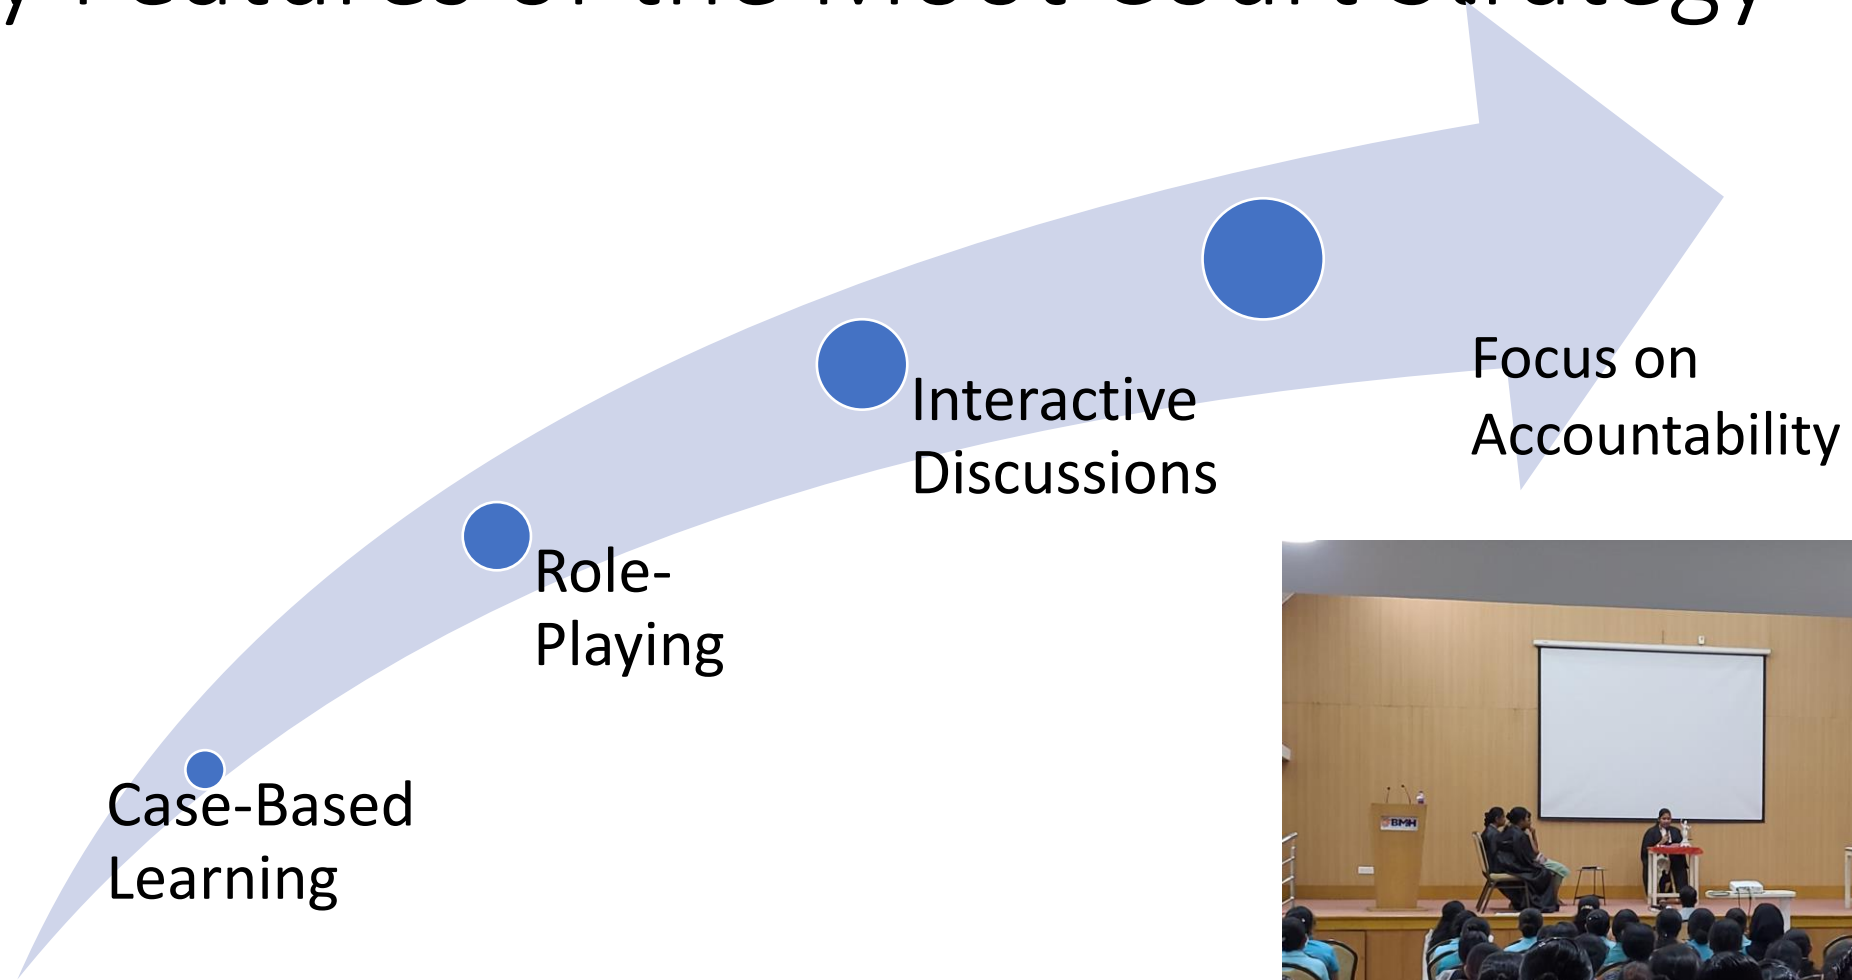

## MOOT COURT

By placing nursing staff in simulated legal scenarios related to real-world incidents, the strategy fosters a deep understanding of the consequences of clinical decisions and the importance of adhering to safety protocols.

Details of the solution

# Key Features of the Moot Court Strategy

# Relevance and impact of the solution

## Direct Application to Clinical Practice

Address real incidents

Learning immediately, relevant and applicable to daily nursing responsibilities

## Legal and Ethical Awareness

Integrating legal education with clinical practice

Enhancing nurses' awareness of the importance of following protocols

# Impact

## Improved Clinical Decision-Making

- Increase in their confidence and competence in making clinical decisions
- Addressing situations with potential legal implications

## Reduction in Patient Harm

- Reduction in incident
- Enhancing patient safety

## Enhanced Communication Skills

- Role-playing aspect of Moot Court improved participants' communication skills
- Improved confidence in both clinical settings and in situations where they must advocate for patient safety.

# Usefulness of the solution to other hospitals

**Adaptable** Across  
Clinical Scenarios

Cost-Effective  
**Implementation**

**Scalability**

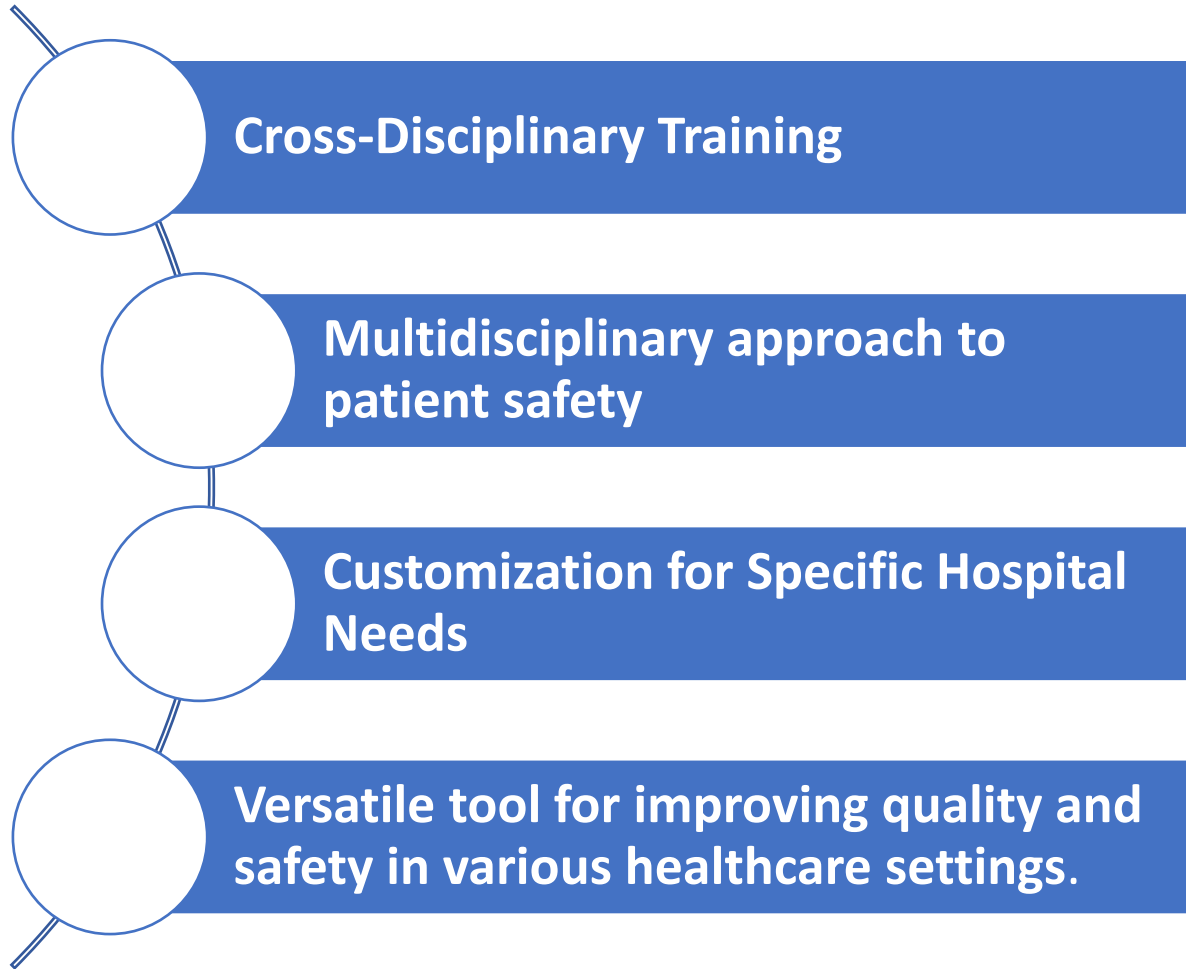

**Integration** into Existing  
Training Programs

Universal Application for  
Patient Safety

Legal Preparedness and Risk  
Management

Building a Culture of  
Accountability

# Expansion Potential and Conclusion

- An innovative, impactful, and scalable solution for enhancing patient safety and legal awareness in nursing practice.
- Its adaptability and ease of implementation make it an attractive option for hospitals seeking to improve their training programs and reduce patient harm
- emphasize the importance of following safety protocols
- better patient outcomes across diverse healthcare settings.

THANK YOU
